October 27<sup>th</sup>, 2017

Dear HL7 Member,

The Public Health and Emergency Response Work Group has asked me to forward you a set of recommended corrections and modifications to the currently published "**HL7 CDA® R2 IG: Reporting to Public Health Cancer Registries from Ambulatory Healthcare Providers, R1, DSTU Release 1.1- US Realm**". The referenced document can be found on at

[http://www.hl7.org/implement/standards/product\\_brief.cfm?product\\_id=398](http://www.hl7.org/implement/standards/product_brief.cfm?product_id=398)

These errata will allow the IG to be able to accommodate the TNM Clinical Stage Group 8th edition.

A future balloted and published version of this Implementation Guide will contain these recommended changes. However, the Public Health Work Group felt that the activity in the US supporting the adoption of Meaningful Use Rules and a push for increased interoperability among providers and public health agencies supporting reporting Cancer to Public Health agencies from Ambulatory Providers warranted that this letter be sent out to ensure that all who use this Implementation Guide have the most current information available for implementation. The types of errata contained in the package include: corrections to typographical errors, updates to Value Sets, and fixes to structural CDA errors.

|   |   |
|---|---|
| The errata package contains the file:                   |   |
| CancerRegistryReportingR1.1_Errata_List_2017_10_23.xlsx | Errata changes are provided on the "errata" worksheet and planned changes on the "Planned Changes" worksheet. |
| voc.xml   | These documents have been updated based on errata in the spreadsheet.   |

Sincerely,

Wayne Kubick  
 HL7 CTO
